ABOUT ME

◉ Highly skilled software developer with expertise in Node.js and Express.js for building robust and scalable RESTful APIs. Proficient in Java for developing freelance desktop projects. Experienced in designing and implementing efficient backend systems and collaborating with cross-functional teams to deliver high-quality solutions. Strong problem-solving skills and a passion for creating innovative and user-centric software applications. A dedicated and adaptable professional with a track record of delivering projects on time and exceeding client expectations.

WORK EXPERIENCE

◉ **BACKEND DEVELOPER | JUN 2022 - PRESENT**

AIA SINGAPORE, SINGAPORE
- Designed and developed backend services and systems to meet user requirements and enhance product functionality.
- Collaborated with team members to analyze project requirements and translate them into scalable backend solutions.
- Implemented best practices for backend development, ensuring code efficiency, maintainability, and scalability.
- Worked closely with front-end developers to create and maintain APIs, ensuring seamless integration and efficient communication between the front-end and backend systems.
- Conducted thorough testing and debugging of backend functionalities to ensure high-quality and bug-free code.
